

About Us

Anthony Stiff Associates is a well established, multidisciplinary landscape architecture practice based in Oxfordshire. We are registered with the Landscape Institute.

We have designed and implemented play and resource areas for clients throughout Oxfordshire.

We have a friendly and collaborative approach to working with clients and aim to offer innovation and good value for money.

Get the best from your play area

Your play space is a valuable asset to your school or community. It should be maximised to provide new play challenges and opportunities. As landscape architects we can help you engage with children to design and create new environments to inspire all ages of children. We offer a design and construction supervision service which will make the whole process so much easier. We can guide you through the process from concept to completion.

What do you want in your play area?

risk and challenge
natural elements
range of play experiences
all ages

Evolving play
disabled and non-disabled
Bespoke
community needs

The way we work

Our involvement is tailored to match your specific requirements and budget. As professional landscape architects we look at how to realise the potential of your space, however small or large. All of our designs are site specific and bespoke.

All design and project work is overseen by experienced play designer Carolyn Place, well known throughout Oxfordshire for her work in play and schools design.

She is always on hand throughout the project from from the initial consultation to implementation.

We offer professional and friendly advice to make your project happen. We can:

- Run consultations
- Advise on grant applications
- Create master plans
- Visualise & produce concept ideas
- Design individual spaces
- Produce cost estimates
- Find contractors & Prepare contracts
- Supervise site works

CASE STUDY

Jubilee Park, Harwell

A very tired, underutilised and boring play area was redesigned to create an exciting and engaging play area for all ages and abilities of young people. Existing features and a large mound proved invaluable in the new play area. Introducing a range of Robinia play equipment including a 4m tower and bridge have proved favourites.

A series of grants including WREN contributed to a total project value of nearly £85,000. Anthony Stiff Associates advised throughout the grant application and design process. We ran a competitive tender process to choose the best contractor for the job and supervised the whole installation process.

Construction work started in autumn 2012 and the final phase was completed in summer 2013.

Construction at one of our sites

"Carolyn Place from Anthony Stiff Associates, gave us the encouragement we needed, she drew up the plans, advised us about which companies would give up value for money for equipment and recommended to us which companies could do the ground work. She informed us about other play parks in the area which we should look at to see what was available and what may be appropriate for our scheme. At times when we flagged and lost enthusiasm, particularly when applying for financial support, there was always someone at the end of the phone and often in person to support us and encourage us to try different applications. We are very glad we were recommended to use Anthony Stiff Associates and would gladly recommend them to anyone else looking for advice and knowledge about building or refurbishing play areas."

Kate Beswick, Harwell Parish Council

If you are considering improving your existing play area or school grounds and would be interested in talking to a Landscape Architect we would be very happy to come out and visit your site and discuss your options free of charge.
